Richard COWAN – list of publications

1. **Cowan, R.** - Stochastic properties of equilibrium traffic flow, Ph.D. dissertation UNSW (1970).

2. **Cowan, R.** - A road with no overtaking. *Australian Journal of Statistics* **13**, 2 94-116 (1971).

3. **Cowan, R.** & Eriksson, S. - On the floating vehicle problem. *Proc. ARRB.* **6**, 3 137-143 (1972).

4. **Cowan, R.** - A closed-circuit road. *Transportation Research* **8** 157-159 (1974) .

5. **Cowan, R.** - A mathematical study of one and two lane roads. Aust. Road Research Tech. Report (1974)

6. **Cowan, R.** - Useful Headway Models. *Transportation Research* **9** 371-375 (1975).

7. Parker P. & **Cowan, R.** - Some properties of line-segment processes. *J. Applied Probability* **13** 96-107 (1976).

8. **Cowan, R.** & Zabczyk, J. - A new version of the best choice problem. *Bull. Polish Acad. Sci.* **24**, 9 773-778 (1976).

9. **Cowan, R.** & Zabczyk, J. - An optimal selection problem associated with the Poisson Process. *Theory of Probability and its Applications* **23** 606-624 (1978) .

10. **Cowan, R.** - The uses of the ergodic theorems in random geometry. *Advances in Applied Probability* **10** 36-46 (1978).

11. **Cowan, R.** - An improved model for signalised intersections with vehicle-actuated control. *J. Applied Probability* **15** 384-396 (1978).

12. **Cowan, R.** - The uncontrolled traffic merge. *J. Applied Probability* **16** 384-392 (1979).

13. Morris, V.B., **Cowan, R.** & Culpin, D. - The variability of cell cycle times measured in vivo in the embryonic chick retina by continuous labelling with 5-bromodeoxyuridine. *Nature* **280** 68-70 (1979).

14. **Cowan, R.** - Properties of ergodic random mosaic processes. *Mathematische Nachrichten* **97** 89-102 (1980) .

15. **Cowan, R.** - Homogeneous line segment processes. *Mathematical Proceedings of the Cambridge Philosophical Society* **86** 481-489 (1979) .

16. Simon, R. & **Cowan, R.** - Collisions with roadside objects. Report for the NSW Traffic Authority. (1979).

17. **Cowan, R.** - Further results on single-lane traffic flow. *J. Applied Probability* **17** 523-531 (1980).

18. **Cowan, R.** - Signalised intersections - capacity and timing guide. (R. Ackcelik, J. Luk, editors) (1979).

19. **Cowan, R.** - Lectures notes on the theory of point processes. *Matematyka Stosowana* ziii (1978) 5-27.

20. **Cowan, R.** - If X, Y, Z are iid uniform on [0,1], then $(XY)^Z$ is uniformly distributed too. *DMS Newsletter* **66**, 2 (CSIRO, Australia) (1980)

21. **Cowan, R.** - An analysis of the fixed-cycle traffic light problem. *J. Applied Probability* **18** 672-683 (1981) .

22. **Cowan, R.** - A stochastic model of the BOS steel making furnace. SIROMATH Technical Report (1981).

23. **Cowan, R.**, Culpin, D., Morris, V. - A method for the measurement of variability in cell lifetimes. *Math Biosciences* **54** 249-263 (1981).

24. **Cowan, R.** - The Statistical Consequences of Changes in Sampling Lot Size for the Output of Australian Sugar Mills. SIROMATH Technical report (1982).

25. Culpin, D. & **Cowan, R.** - The fabrication of a three-dimensional feeder: a problem in sheet-metal bending. *The Application of Mathematics in Industry* (eds. R.S.Anderssen & F. de Hoog) Martinus Nijhoff, The Hague 165-169 (1982).

26. **Cowan, R.** - A model for Random Packing of Disks in the Neighbourhood of One Disk. *SIAM J. Applied Maths.* **44,** 4 839-853 (1984).

27. **Cowan, R.** - A collection of problems in random geometry. *Stochastic Geometry, Geometric Statistics, Stereology* (eds. Weil & Ambartsumian) Teubner (1984).

28. Morris, V. & **Cowan, R.** - A growth curve of cell numbers in the neural retina of embryonic chicks. *Cell & Tissue Kinetics* **17** 199-208 (1984).

29. **Cowan, R.** - Adams' Formula Revised. *Traffic Engineering & Control* **25,** 5 272-274 (1984).

30. Allen, T., Aliano, N., **Cowan, R.**, Grigg, G., Hart, N., Lamberton, J. and Lane, A. - Amplification of the anti-tumor activity of Phleomycins and Bleomycins in rats and mice by Caffeine. *Cancer Research* **45** 2516-2521 (1985).

31. Staudte, R., & **Cowan, R.** - Models for dependent cell populations. Proc. Imacs Conference, Oslo (1985).

32. **Cowan, R.** Branching process results in terms of moments of the generation time distribution. *Biometrics* **41** 681-689 (1985).

33. **Cowan, R.** & Staudte, R. - The bifurcating autoregression model in cell lineage studies. *Biometrics* **42** 769-783 (1986).

34. **Cowan, R.** - An extension of Tanner's results on uncontrolled intersections. *Queueing Systems* **1** 249-263 (1987).

35. **Cowan, R.** & Morris, V. - Cell population dynamics during the differentiative phase of Tissue Development. *J. Theoretical Biology* **122** , 205-224 (1985).

36. **Cowan, R.** - Hand evaluation in the game of Contract Bridge. *J. Royal Statistical Society: Series C; Applied Statistics* **36** 58-71 (1987).

37. **Cowan, R.** - A bivariate exponential distribution arising in random geometry. *Annals Institute of Mathematical Statistics* **39** 103-111 (1987).

38. **Cowan, R.** & Morris, V. B. - Determination of proliferative parameters from growth curves. *Cell & Tissue Kinetics* **20** 153-159 (1987).

39. **Cowan, R.**, Collis, C. M. & Grigg, G. W. - Breakage of double-stranded DNA due to single-stranded nicking. *J. Theoretical Biology* **127** 229-245 (1987) .

40. **Cowan, R.** & Morris, V. B. - Division Rules for Polygonal Cells. *J. Theoretical Biology* **131** 33-42 (1988).

41. **Cowan, R.** & Underwood, P. A., - Steric effects in antibody reactions with polyvalent antigen. *J. Theoretical Biology* **132** 319-335 (1988).

42. **Cowan, R.**, - Objects arranged randomly in space: an accessible theory. *Advances in Applied Probability.* **21** 543-569 (1989) .

43. **Cowan, R.**, The division of space and the Poisson distribution. *Adv. Applied Probability* **21** 233-234 (1989) .

44. **Cowan, R.,** Culpin, D. and Gates, D.- Asymptotic results for a problem of DNA breakage. *J. Applied Probability.* **27** 433-439 (1990).

45. Dunn, I. S., **Cowan, R.** & Jennings, P. A., - Improved peptide function from random mutagenesis over short "windows". *Protein Engineering* **2** 283-291 (1988).

46. Morris, V. B., Dixon, K. E. and **Cowan, R.**, - The topology of cleavage patterns, with examples from *Nereis*, *Styela* and *Xenopus. Phil.Trans. R.Soc. Lond.* B, **325** 1-36 (1989).

47. Sved, J. & **Cowan, R.**, An analysis of the heterogeneity of codon usage between different human genes. in *Molecular evolution* 297-304 (1990).

48. **Cowan, R.** A simple formula for solvent accessible areas of amino acid side chains, *Biochem. Biophys. Res. Comm*. **156** 792-795 (1988)

49. P. Pennycuik & **Cowan, R.**, - Odour and food preferences of house mice, *Mus musculus*. *Aust. J. Zoology*. **38** 241-247 (1990).

50. **Cowan, R.** & Whittaker, R.G., Hydrophobicity indices for amino acid residues as determined by HPLC. *Peptide Research*. **3** 75-80 (1990).

51. Au, K. Y. M., Yao, C. M., **Cowan, R**. and Ng, S. F., Programming of the Macronucleus of *Paramecium* during Asexual and Sexual Reproduction: A Further Study with Cytidine Analogues, Dimethylsulfoxide, L-Ethionine and N-Butyric Acid. *European J. Protistology*. **26** 25-36 (1990).

52. **Cowan, R**. Expected frequencies of DNA patterns using Whittle's formula. *J. Appl. Prob*. **28**, 886-892 (1991)

53. **Cowan, R.** The Allocation of Offensive and Defensive Resources in a Territorial Game. *J. Appl. Prob.* **29**, 190-195 (1992)

54. Lam, K. and **Cowan, R.** Stochastic reversibility in self-organising systems. *Stochastic Models* **8(2)**, 325-336 (1992)

55. Hermans, M. H. A., Wubbena, A., Kroese, F. G. M., Hunt, S. V., **Cowan, R.** and Opstelten, D. The extent of clonal structure in different lymphoid organs. *J. Exper. Medicine* **175**,1255-1269 (1992)

56. **Cowan, R.** A constraint on the random packing of disks. *J. Appl. Prob.* **30**, 263-268 (1993)

57. **Cowan, R.** and Chiu, S.N. A stochastic model of fragment formation when DNA replicates . *J. Appl. Prob.* **31**, 301-308 (1994)

58. **Cowan, R.** and A. K. L. Tsang. The falling-leaf mosaic and its equilibrium properties. *Adv. Appl. Prob.* **26**, 54-62 (1994)

59. **Cowan, R.** Expected pattern frequency in Markov Chain realisations conditional upon transition counts. *Theory of Probability and its Applications* **37**, 320-322 (1992)

60. Yu, P.L.H. and **Cowan R.** Statistical models of duplicate tournaments in games of luck and skill. *Australian J. Statistics*, **37**, 1-17 (1995)

61. **Cowan, R.**, Chiu, S.N. and Holst, L. A limit theorem for the replication time of a DNA molecule. *J. Appl. Prob.* **32**, 296-303 (1995)

62. Lee, T. and **Cowan, R.** A stochastic tessellation of digital space. In *Mathematical morphology and its applications to image processing*, pp217-224. Eds. J. Serra & P. Soille. Kluwer Publishers (1995).

63. Morris, V. B. and **Cowan, R.**, An analysis of the growth of the retinal cell population in embryonic chicks yielding proliferative ratios and cell-cycle times for successive generations of cell cycles. *Cell Proliferation* **28**, 373-391 (1995)

64. **Cowan, R.** , Yu, P .L. H. and Ferguson T. S. Restrictions on the saddle-point solution in the game of Teamball. *J. Appl. Prob*. **33**, 443-447 (1996)

65. **Cowan, R.** and Chen, S. The random division of faces in a planar graph. *Adv. Appl. Prob.* **28**, 377-383 (1996).

66. Staudte, R. G. , Zhang, J., Huggins, R. M. and **Cowan, R.** A re-examination of the cell-lineage data of E.O.Powell. *Biometrics* **52** 1214-1222 (1996)

67. **Cowan, R.** Shapes of rectangular prisms after repeated random division. *Adv. Appl. Prob.* **29**, 26-37 (1997)

68. Chen, F. K. C. and **Cowan, R.** Invariant distributions for shapes in sequences of randomly-divided rectangles. *Adv. Appl. Prob.* **31**, 1-14 (1999)

69. Chong, K. S., **Cowan R.** and Holst, L. The ruin problem and cover times of asymmetric random walks and Brownian motion. *Adv. Appl. Prob.* **32**, 177-192 (2000)

70. **Cowan, R.** and Chen F. K. C. Four interesting problems concerning Markovian shape sequences. *Adv. Appl. Prob.* **32**, 954-968 (2000)

71. **Cowan, R.** Stochastic models for DNA replication. Chapter 4 of *Handbook of Statistics, Volume 21 - Stochastic Processes: Modelling and Simulation.* Eds. D. N. Shanbhag and C. R. Rao. (2003)

72. **Cowan, R.** A new discrete distribution arising in a model of DNA replication. *J. Appl. Prob.* **38**, 754-760 (2001)

73. **Cowan, R.,** Quine, M. and Zuyev, S. Decomposition of Gamma-distributed domains constructed from Poisson point processes. *Advances in Applied Probability*, **35**, 56–69. (2003)

74. **Cowan, R.** A mosaic of triangular cells formed with sequential splitting rules, *Journal of Applied Probability*, **41A** , 3–15. (2004)

75. **Cowan, R.** and Chiu, S. N. Extension of Deltheil's study on random points in a convex quadrilateral, *Advances in Applied Probability*, **37**, 857–858. (2005)

76. **Cowan, R.** A more comprehensive complementary theorem for the analysis of Poisson point processes, *Advances in Applied Probability*, **38**, 581–601. (2006)

77. **Cowan, R.** Identities linking volumes of convex hulls, *Advances in Applied Probability*, **39,** 3, 630–640. (2007)

78. **Cowan, R.** Recurrence relationships for the mean number of faces and vertices for random convex hulls. *Discrete & Computational Geometry*, 43(2) 209-220. (2010). Published in online version of journal: Nov 2008.

79. **Cowan, R.** *Mary Tondut – The Woman in the* Catalpa *Story.* Mini-Publishing, Sydney. (2008). ISBN: 978-0-646-49420-3. A historical monograph.

80. **Cowan, R.** New classes of random tessellations arising from iterative division of cells. *Advances in Applied Probability*, **42,** 1, 26–47. (2010)

81. **Cowan, R.** and Miles, R.E. Convex hulls on a hemisphere. *Advances in Applied Probability*, **41,** 1002–1004. (2009)

82. Weiss, V. and **Cowan, R.** Topological relationships in spatial tessellations. *Advances in Applied Probability*, **43,** 963-984. (2011)

83. Burridge, J., **Cowan, R.** and Ma I. Full- and half-Gilbert tessellations with rectangular cells. *Advances in Applied Probability*, **45,** 1–19. (2013)

84. **Cowan, R.** Line segments in the isotropic planar STIT tessellation. *Advances in Applied Probability*, **45,** 295–311. (2013)

85. **Cowan, R.** and Thäle, C. The character of planar tessellations which are not side-to-side. *Image Analysis and Stereology*, **33**, 39-54 (2014)

86. **Cowan, R.** and Weiss, V. Constraints on the fundamental topological parameters of spatial tessellations. *Mathematische Nachrichten*, **288**, 540-565 (2015).

87. Nguyen, N. L., Weiss, V. and **Cowan, R.** Column tessellations. *Image Analysis and Stereology*, **34**, 87-100 (2015)

88. **Cowan, R**. *Anton's world*. Updated version available at
http://australink.pl/wp-content/uploads/2014/03/AntonsWorldMarch2014.pdf

89. Burridge, J. and **Cowan, R.** Planar tessellations that have the half-Gilbert structure. *Advances in Applied Probability* **48**, 574-584, (2016).

90. Weiss, V. and **Cowan, R.** General exchange formulae for random tessellations and other stationary structures. *In preparation*.

91. **Cowan, R.** and Weiss, V. *Random tessellations and tilings.* A book in preparation (still in early stages).

92. **Cowan, R.** and Weiss, V. Line segments which are unions of tessellation edges. *Image Analysis and Stereology*, **37**, 83-98 (2018)
